

# m\_adm\_meta\_package.sas File Reference

## Admin

Admin macro to create a SAS metadata export package

---

### Description

The batch export tool enable you to perform metadata promotions from an operating system batch script.

### Autors

Paul Alexander Canals y Trocha (paul.canals@gmail.com)

### Date

2023-07-26 00:00:00

### Version

23.1.07

### Link

<https://github.com/paul-canals/toolbox>

## Parameters

Input	help	Parameter, if set (Help or ?) to print the Help information in the log. In all other cases this parameter should be left out from the macro call.
Input	parm_tbl	Full qualified LIBNAME.TABLENAME name of the table containing information on the metadata objects that are to be exported by the script.
Input	platform	Indicator [UNIX WIN] parameter to specify the platform type that is used to run the batch script. The default value is: WIN.
Input	profile	The name of the connection to be used. The connection profile must exist on the system where the export command is executed. You can specify any connection profile that has been created for use with client applications such as SAS Management Console, SAS Data Integration Studio, or SAS OLAP Cube Studio. When you open one of these applications, the available connection profiles are displayed in the drop-down box in the Connect Profile dialog.
Input	packname	Name of the SAS metadata package (SPK).
Input	packpath	Full path to which the SAS metadata package is to be created.
Input	outscript	Full path and name of the export batch script.
Input	debug	Boolean [Y N] parameter to provide verbose mode information. The default value is: N.

## Returns

- MAKEPKG batch file.

## Calls

- [m\\_utl\\_single\\_quotes.sas](#)

## Usage

Example 1: Show help information:

```
%m_adm_meta_package(?)
```

Create export parameter table and make package WIN batch file:

```
data WORK.makepkg_prm;
  order = 1;
  object='/Shared Data/';
  output;
  order = 2;
  object='/Shared Data/SASApp - SASDATA(Library)';
  output;
run;

%m_adm_meta_package(
  parm_tbl = WORK.makepkg_prm
, platform = WIN
, profile   = %str(pact@hermes.pact.sas.com)
, packname  = shared_data.spk
, packpath  = %str(&APPL_PRGM./source/sas/misc/meta)
, outscript = %str(&USER_ROOT./makepkg.bat)
, debug     = N
);
```
